

# THIS WEEK Bangalore

20th – 26th Dec. 2008

## Moderate Mental Retardation was cured through Urine Therapy

This 10 years old boy Jagan was admitted once at Nimhans in 2005 for the diagnose of Moderate Mental Retardation with cerebral palsy. And all his reports from NIMHANS are lost. The child has never been sent to a special school, Jagan was diagnosed with Moderate Mental Retardation and Cerebral Palsy. He could not able to speak, turn his head, move his hands and legs from birth. All his joints were stiff and he was unable to sit and stand. On my advice to his parents started “Urine Therapy” for their son from 1-09-08 to 1-11-2008 (within 60 days) Jagan has started speaking and become active. He can turn his head, the joints of his hands and legs have become loose and mobile. He can hold glass in his hand and drink water said Mr. Jagadish R. Bhurani, the re inventor of this therapy. Jagan is resident of Shanthinagar who’s mother is a maid servant, and father auto driver, it is miraculous improvement that this boy is now able to scroll around from one room to another room, the parents are very happy to see this transformation, many such testimonies are there to give. There many cases like who could avail this therapy free of cost, Urine therapy can control, cure all kinds of Chronic diseases, it is a free service to humanity said Jagadish,

Explaining how it works, Bhurani says urine therapy consists of various steps like drinking one’s own urine, massaging the body with it and applying the wet pack of urine on the portions of the body.

Says Bhurani: “Urine rebuilds the vital organs of brain, heart, lungs, pancreas, liver and kidneys, which are damaged due to disease. It also makes the dead tissues alive and active. Urine massage and urine wet pack gives a great relief to the patients. It relaxes the muscles and dissolves toxins accumulated in the body. It can dissolve the blood clot and open the blood vessels of the heart patients. It can also dissolve the lumps and the lymphnodes of cancer patients. While following the therapy, patients must drink only urine and water, along with some juices and light diet as prescribed by persons who have sound knowledge of urine therapy.” He can be contacted on 9342872578, or email: [jbhurani@gmail.com](mailto:jbhurani@gmail.com)

22nd – 25th Dec. 2007

## Are you ready to try this Therapy?

Are you one of those unfortunate ones who has tried every new age therapy and failed to cure your illness – whatever it may be? Try once more. And you might just get lucky – with Urine Therapy. Or so claims **Jagdish Bhurani**.

Having meticulously studied urine therapy and practiced it, Bhurani claims to have successfully treated many persons of their ailments. Like 55-year-old Ramakrishna Reddy who followed his instructions and was ‘miraculously’ cured of gall bladder stones. When medical tests revealed the presence of multiple stones in his gall bladder, doctors advised Ramakrishna Reddy to go for surgery. On the advice of a well-wisher, he approached Bhurani who put him under urine therapy for a period of 50 days. Five days after the treatment started, the acute pain in his stomach vanished, and after 45 days, medical tests indicated there was no trace of any stones in his bladder.

Bhurani cites another example of how his therapy worked wonders for Radha, who was diagnosed with breast cancer. After the biopsy confirmed the lump in her breast as cancerous, she was advised to undergo chemotherapy treatment and removal of her breast. A desperate Radha agreed to be put under urine therapy. “Within 12 days of the treatment, the severe pain in her breast had gone, and it became normal, the earlier stiffness was gone. She gained in confidence, and continued the therapy. For the last 13 months, she has not taken any medicines, and has not undergone any kind of surgery or chemotherapy treatment. Now, she has no

Problems whatsoever and is a normal life,” says Bhurani.

Explaining how it works, Bhurani says urine therapy consists of various steps like drinking one's own urine, massaging the body with it and applying the wet pack of urine on the portions of the body.

Says Bhurani: “Urine rebuilds the vital organs of brain, heart, lungs, pancreas, liver and kidneys, which are damaged due to disease. It also makes the dead tissues alive and active. Urine massage and urine wet pack gives a great relief to the patients. It relaxes the muscles and dissolves toxins accumulated in the body. It can dissolve the blood clot and open the blood vessels of the heart patients. It can also dissolve the lumps and the lymph nodes of cancer patients. While following the therapy, patients must drink only urine and water, along with some juices and light diet as prescribed by persons who have sound knowledge of urine therapy.”

*Desperate measures call for desperate solutions. In a world where there are therapies a dime a dozen, one more does not hurt...(Jagdish Bhurani can be contacted on 9342872578)*
